## 2008 Reverse Engineering Vendors Directory

Welcome to the 2008 Reverse Engineering Vendors directory. Inside you will find a comprehensive listing of companies working in the field of reverse engineering and laser scanning. Whether your company is looking for a way to create legacy data, inspect parts, create personalized products or find exact measurements you will find something useful here.

This year's vendors directory is divided into four sections based on the way listed companies gather reverse engineering data. These sections include point cloud, feature-based, hybrid and measuring technology.

No matter what your needs are you will find a scanning solution to help meet your business challenges.
